Office Action Summary

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 1-7 are rejected under 35 U.S.C. 102(a) as being anticipated by Yamamoto et al. (US 2002/0054987 A1).

Yamamoto discloses a microporous stencil sheet comprising inelastic resin film [0023]. Examples of the resin film are disclosed in paragraph [0030], and the film has an air permeability of 1-600 seconds [0023]. The pore size of the micropores is 0.1-10 um[0027], and the sheet has a porosity of 40-90% [0028]. The sheet further comprises antistatic agent such as various surfactant [0044]. The ink for printing on the microporous stencil sheet has a viscosity of 0.1Pa.s or less [0024]. With respect to the ratio of G1/G2, dot size ratio and water absorption value it is elementary that the mere recitation of newly discovered function or property, inherently possessed by things in the prior art, does not cause a claim drawn to those things to distinguish over the prior art." In re swinehart et al., 169 USPQ 226 at 229. Since the Okumura reference teaches all of Applicant's claimed compositional and positional limitations, it is inherent that the reference article function in the same manner claimed by Applicant. The burden is upon

Applicant to prove that the subject matter shown to be in the prior art does not possess the characteristic relied on.

Since the resin of Yamamoto is substantially identical to the claimed resin, the resin of Yamamoto inherently posses the claimed properties i.e., ratio of G1/G2, peak melting temperature and melting energy.

Allowable Subject Matter

3. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Yamamoto does not teach or suggest the claimed process of making the stencil.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 571-272-1529. The examiner can normally be reached on Mon.-Fri. 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
